Figure 1 illustrates the mapping of various features to a set of 1000 words. The features are categorized into three groups: Highway, Ridge/Physical Feature, and Nonphysical Boundary. These features are mapped to words in three boxes: Modest, Inset, and Out Area.

Feature Category	Feature	Word Set
Highway	Primary Road	Modest
	Secondary Road	
	Jeep Trail/Walkway/Ferry	
Ridge/Physical Feature	Pipe/Power Line	Inset
	Ridge/Physical Feature	
Nonphysical Boundary	Property/Fence Line	Out Area
	Nonphysical Boundary	

Where international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

1. A "*" following a place name indicates that the place is coterminous with a MCD. A "C" indicates that the place is also a false MCD; the false MCD name is shown in parentheses.
2. This map shows tribal census tract boundaries and numbers within the subject entity; nontribal census tract boundaries are shown outside of the subject entity, without numbers. A tribal census tract is a type of census tract defined within a federally recognized American Indian reservation or off-reservation trust land for the purpose of providing data based on an individual's tribal affiliation. A tribal census tract is not a county, state, or off-reservation trust lands cross state or county boundaries; the same tribal census tract number may be assigned on both sides of the boundary, even if, in fact, the jurisdiction is different.
3. A "*" following a block number indicates that the block number is repeated elsewhere in the block.

ENTITY TYPE: American Indian Reservation
NAME: Navajo Nation Reservation and Off-Reservation Trust Land (2430)
ST: Arizona, New Mexico, Utah
